EESSI at Microsoft Azure

September 2022, hugo.meiland@microsoft.com

HPC at Microsoft

- From explaining we actually run Linux to
 - #10 in Top500 (Nov 2021)
 - #26,27,28,29 in Top500 (June 2021)
 - Supercomputers for several large customers
- Specialty HPC SKU's
 - 5/6 generations of CPU, 7-9 generations of GPU
 - Nvidia/Mellanox InfiniBand in most of these VM's
- 2 main scenarios:
 - Lift & shift: traditional schedulers Slurm, PBS, LSF & posix filesystems
 - Cloud native: serverless & object/blob storage

HPC vm fleet (InfiniBand enabled only...)

VM	Cpu arch	Mem	Mem bw	InfiniBand	Local Scratch	Remarks
H16(m)r	Intel Haswell	112/224		56 Gb/s FDR	2 TB	EOL August 2022
HC44rs	Intel Skylake	352 (8)		100 Gb/s EDR	700 GB	
HB60	AMD Naples	228 (4)	260 GB/s	100 Gb/s EDR	700 GB	
HB120_v2	AMD Rome	456 (4)	350 GB/s	200 Gb/s HDR	900 GB	
HB120_v3	AMD Milan(-X)	448 (4)	350 GB/s	200 Gb/s HDR	2.1 TB	Migrating to -X

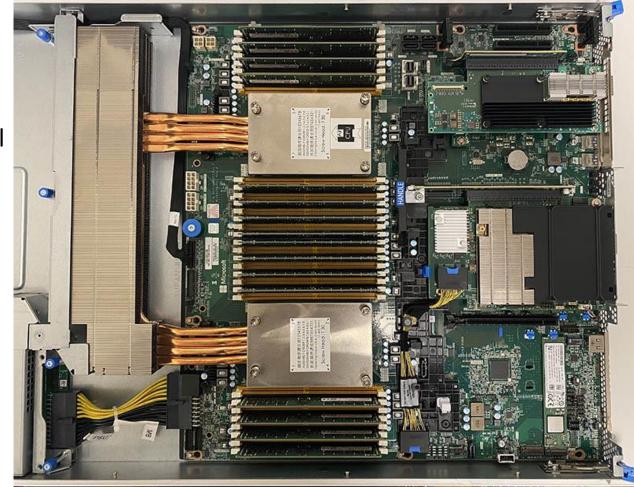

VM	Cpu arch	Mem	GPU	InfiniBand	Local Scratch	Remarks
NC24r	Intel Broadwell	224	K80 (4x)	56 Gb/s FDR	1.44 TB	
NC24rs_v2	Intel Broadwell	448	P100 (4x)	56 Gb/s FDR	3 TB	
NC24rs_v3	Intel Broadwell	448	V100 (4x)	56 Gb/s FDR	3 TB	
ND24rs	Intel Broadwell	448	P40 (4x)	56 Gb/s FDR	3 TB	
ND40rs_v2	Intel Skylake	672	V100 (8x)	100 Gb/s EDR	2.9 TB	NVlink
ND96asr_A100_v4	AMD Rome	900	A100 (8x)	200 Gb/s HDR (8x)	6.5 TB	40 GB A100 + NV
ND96amsr _A100_v4	AMD Rome	1900	A100 (8x)	200 Gb/s HDR (8x)	6.5 TB	80 GB A100 + NV

Infiniband in Azure

- InfiniBand for MPI/NCCL
 - Not for storage / heterogenous
- Stamps == cluster == IB connectivity
- SR-IOV:
 - 387e:00:02.0 Infiniband controller: Mellanox Technologies MT27800 Family [ConnectX-5 Virtual Function]
- InfiniBand Partitions
 - Subnet manager is provided
 - No access to vlane 0
 - So no ibtracert and friends
- Use through Availability Zone or VMSS
 - Azure Cyclecloud for orchestration
 - we can combine multiple vmss in single cluster

© ServeTheHome

CVMFS repo or EESSI

- Several tries based on EasyBuild: arch vs skus? which OS? which compilers?
 - Our team can only run "best effort" services
 - Figuring out customer expectations
 - Do you really need compiler XYZ / flag PQR?
 - Or is ml load <application>, mpirun <application> compelling enough?
 - Better to build containers?
- Tracking / (working on) EESSI:
 - Integrated into Az-HOP today
 - Need to double down on CPU detection, GPU and end-2-end runs
 - (upcoming hackathon!)

EESSI client

- Client (with EESSI config)
 - Integrated into Az-HOP (HPC Ondemand Platform)
 - Testing in WSL2, lack of automount is still a gap (wsl2_config not working for me... mount –t cymfs does...)

OSU MPI Bandwidth Test v5.6.3

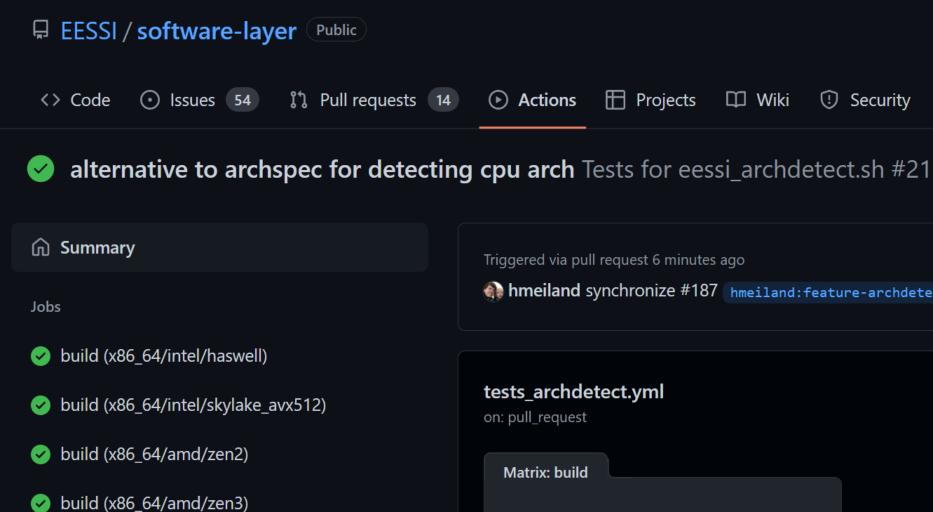

Leveraging EESSI for WRF simulations at scale on Azure HPC

davide.vanzo@microsoft.com hugo.meiland@microsoft.com

Running WRF3 on Zen3

```
#!/bin/bash
#SBATCH --nodes=<N>
#SBATCH --tasks-per-node=120
export EESSI_SOFTWARE_SUBDIR_OVERRIDE=x86 64/amd/zen3
                                                          #archspec/pku
source /cvmfs/pilot.eessi-hpc.org/versions/2021.12/init/bash
module load WRF/3.9.1.1-foss-2020a-dmpar
mkdir wrf job 2.5
cd wrf job 2.5
ln -s `dirname $(which wrf.exe) `/../run/* .
rm namelist.input
ln -s \sim /WRF test/bench 2.5km/*.
                             #fixed in foss2021a/OpenMPI4.1.1
export OMPI MCA pml=ucx
time mpirun wrf.exe
```

! Security

✓ Insights

CVMFS code + Stratus network

- Added support for Azure Blob next to S3 (okt 2021?)
- Cvmfs_server can build stratum0 directly on Azure Blob
 - With keys in keyvault, build machine is expandable
- Adding Azurite tests for Azure Blob over HTTPS
 - Technically verified this week;)
- Todo: set up stratum1 based on Azure Blob
- Using traffic manager i.s.o. geo-ip
- Sync containers i.s.o. stratum0 -> stratum1

Next steps

- Extending work with/on EESSI with focus on WRF & MD
 - To better support end-to-end applications in Az-HOP
 - Including ReFrame (performance) testing for regression
 - Refresh CiTC work or switch to Magic Castle?
- Dive deeper and pick up learnings on container deployments
 - As alternative to container registry for HPC
- Happy to discuss/test/extend serverless CVMFS

Thank you!
